Mind Map

Milk Production of a Dairy Cow

You are going to create a mind map or concept map depicting the various steps, and rules in milk production of a cow. You will start your mind map by identifying the main idea in the middle of the page (Milk Production of a Dairy cow) and you will branch off ideas from there by categories. Your map should have a sequence flow and should include at least 25 different items. Your items can be facts, steps, and most importantly pictures! At least 15 of your items should be pictures. Your maps should be in full color. Ideas that should be addressed in your mind map are the steps involved with dairy production from grass to the birth of the calf and how this triggers production all the way to the consumable product. Have fun and be creative! Use as many pictures as you can! Your mind remembers things better when it has a colored picture to go by!

Criteria	Your Points	Possible Points	Comments
25 points are clear with at least 15 of those as pictures. 15 is a minimum for 75%. The more the better!		25	
Your mind map is colorful and neat.		10	
Address all the steps involved with dairy production		25	

Total _____/60
