Aquaculture

Children's Book Creation Project

This is your opportunity to be creative and have a little fun in class. Throughout the last few days we have been learning about aquaculture and its impact on our environment and economy. Now it's your chance to make something that combines all the items that we have learned about.

Instructions:

You are to create a children's book that will incorporate aquatic life. It must be at least 20 pages in length (20 single sided or 10 front and back). The book must be about aquatic life and must include the list of words that is on the bottom of this page. Your book must also be in color and must be legible. You can computer generate you book, you can draw and hand write it, or you can use a combination of computer and self generated materials; it is up to you. The book must be bound somehow: in a three ring binder, report cover, or by some other means.

Terms to be included:

Dorsal Fin
Lateral Line
Caudal Fin
Bait
Carnivore
Herbivore
Fingerling
Fry
Gill

Items to be Included:

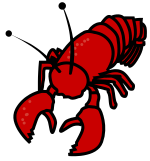

10 Fish
2 Aquatic Plants
1 Mollusk
1 Crustacean

Tips when writing:

A few things to remember when writing your book is that you need to include color and make sure all of the terms that need to be included. Also, your project need to be 20 pages; it can be more (the more the better). Finally, remember who your audience is, you are writing this book for children (ages 8-10). It should be written at a level so that children can understand it and still like the story line. But remember – have fun and be creative!

You will have ONE week of computer time. The next week will be used for drawing, coloring, binding, etc.

Completed Project is due April 21st by the end of class.

Aquaculture
Children's Book Creation Project

Item Description/Instructor's comments	Points Possible	Points Earned
Book is at least 20 pages, which could include 10 pages front and back.	50	
Book is bound somehow. In a three ring binder, project slip cover, or some type of binding	20	
Book is in color and is legible.	50	
Book includes the terms and other required items.	100	
Book is written at the appropriate age level (8-10)	30	
Total	250
